

Accessory for Automatic Air and Vacuum Valve

Model 985-00

Flushing device for H-TEC Model 986
ARV Sets and Manhole Free Sets

Article#	Material	Upper Connection	High ft/mm	Weight lbs./Kg
9850001200	steel, epoxy powder coated	2" male thread	3.4 ft 1,030 mm	17.2 lbs. 7.8 Kg

Features:

For easy pipe flushing of a pipeline section after removing the ARV from H-TEC Automatic Air and Vacuum Release Valve Sets or ARV with shut-off for manhole installations of the H-TEC Model #986.

No bending into the manhole shaft.

Dual use increases efficiency:

- ARV location that eliminates confined space entry
- Entry point for flushing and cleaning

Note: For installation isolate the Air Valve, relieve pressure and remove the Air Valve. With the isolation valve closed, insert the Flushing Device lock into position. The isolation valve must be opened for free access to the pipeline.
