Automatic Air and Vacuum Valve

Model 9922 Water Tapping Set for air valve set 992

Features:
 Can be used instead of the air release valve in an air valve set (Model no. 992). Use Water tapping set for flushing or sampling device under pressure.

Max. operating pressure: 250 psi / 17.2 bar
 Pipe, screw connection and elbow: Steel
 Fitting: GJL-250 (GG-25), fluidized bed epoxy powder coated
 Push fitting: POM, NBR
 Ball valve: brass

Advantages:
 Installation and dismantling under pressure
 Use for flushing and venting after initial start-up and/or filling of pipelines
 Controlled water tapping via ball valve
 Pressure testing
