

Automatic Air and Vacuum Valve for Potable Water

Model 992FP
Flood protection for HaVent automatic air valve set, H-TEC model 992

Features:

For below ground installation in addition to an H-TEC HaVent automatic air valve set model 992. This flood-proof device is retrofittable to existing set installations under pressure.

Below ground installation with pipe extension either through:

1. PE connector 1 1/2" / d50
2. Welding sockets
3. Butt-welding

The height of the exhaust air pipe is variable.

Waterproof up to 16 ft. / 5 m water column.

Advantages:

- Easy maintenance: open the waterproof lid for access to the air release valve.
- Less public space consumption
- Flexible positioning of pipe extension
- Accident-proof installation

Scope of delivery: PE chamber with gasket and screw cap

Outlet pipe: PE d50 (1 1/2"), 0.7" / 18 mm long
